Profile Summary

Computer Science undergraduate with a strong foundation in software engineering, specializing in web development, automation, and DevOps. Someone who thrives in collaborative environments who is known for problem-solving, adaptability, and effective communication and is passionate about building impactful, scalable solutions.

Education

Amrita Vishwa Vidyapeetham <i>Bachelor of Technology in Computer Science and Engineering (Current CGPA: 9.74)</i>	Expected October 2026 Amritapuri, Kerala
Montfort World School <i>12th Percentage(Non-Medical): 97%, 10th Percentage: 98%</i>	2020 - 2022 Karnal, Haryana

Experience

SDE Intern - Galaxy.ai <i>Full-Stack</i> - Worked on implementing new tools and features for the Galaxy.ai web application. - Optimized existing workflows, refactored codebase and fixed existing issues.	July 2025 - August 2025
Google Summer of Code Contributor - Learning Equality <i>Testing/Automation</i> - Worked on implementing a visual regression testing mechanism for Learning Equality's Kolibri Design System. - Integrated visual testing to KDS' GitHub workflows. - Made the new mechanism available to hundreds of people contributing to the organization's repositories, making it easy for the developers and maintainers to develop their product without having to worry about manually testing the UI changes made.	May 2024 - August 2024
Open-source contributor <i>Web/DevOps</i> - Contributed to the codebase of Learning Equality and Internet Archive. - Worked on UI changes (ensuring expected behavior, tab accessibility), fixing backend errors (input sanitization, adding validations for backend calls), introducing new functionality, GitHub actions, etc.	November 2023 - Present

Positions of Responsibility

amFOSS - Amritapuri Free and Open Source Software Club <i>Member and Mentor</i> Website	Jan 2023 - Present Amritapuri, Kerala
- Provided mentorship to over 20 new club members, fostering their involvement in open-source projects and encouraging participation in events like hackathons and meetups. - Led and orchestrated numerous events for the club, including various hackathons, workshops and conferences.	

Projects

SpazzAI (2025) <i>Next.js, AWS, Serverless Stack (sst.dev)</i> Link - Worked as a member of Amrita Medical AI research group to develop a platform for hospitals to help doctors evaluate the spasticity levels in patients. - Developed the application UI, ensuring a seamless user experience. - Led the backend development independently. Worked with AWS and sst.dev to implement efficient backend services and ensure scalability. - Prepared the platform for launch for the data collection phase. Will be working on integrating a pipeline to detect spasticity levels using computer vision on the collected data.
HCI (Human-Computer Interaction) application (2024) <i>React.js, Django, Docker</i> GitHub

- Developed a web application for a research paper to measure human-computer interaction. The study aimed to determine the extent of the dependence of people on artificial intelligence for their work.
- Worked on the DevOps operations for the project. Dockerized and deployed the API in the server.
- Implemented the backend functionality for efficient storage and retrieval of data based on user's interaction with the application.
- Successfully deployed to conduct the research study with over **500 volunteers**.

Orbyq (2025) | *Spring boot, Electron, Next.js* | [GitHub](#)

- Developed a desktop application to serve as a replacement for apps like Notion, Trello, etc, featuring real-time task/project tracking and dynamic weekly productivity charts.
- Implemented smart activity linking using custom JPA queries to connect tasks with projects, eliminating data gaps in project logs.
- Designed a responsive UI with Tailwind CSS and bottom-aligned visualizations for enhanced clarity and user focus.

amFOSS Website (2024) | *Next.js, Tailwind, Framer motion* | [Link](#)

- Served as a developer and maintainer for the revamped club webpage.
- Enhanced user experience by implementing a proposed design focused on usability.
- Acted as a maintainer by reviewing all pull requests and delegating tasks within the team.

Technical Skills

Languages: Python, C++, Javascript

Technologies: React.js, Vue.js, Next.js, Django, Spring boot, Flask, Node.js, MongoDB, PostgreSQL, MySQL

Concepts: Web Development, DevOps, Databases, UI/UX Design

Languages

- **Hindi:** Native Proficiency
- **English:** Professional Proficiency
- **Punjabi:** Fluent

Social Outreach

Student Social Responsibility (SSR) Project | 2024

- Led a team of four in organizing a technical skills development workshop for school students as part of the SSR project at my college.
- Introduced the students to technical areas such as cyber security, open-source, and made them aware of how they can navigate the online space carefully.

Achievements

Representative at G20 Conference | 2023

- Represented my university as a technical expert in global discussions addressing key issues and innovations in Cybercrime and Security.
- Inducted as a member of the inaugural Cyber Volunteer Squad, established by the I4C under the Ministry of Home Affairs (MHA) to combat cybercrime.

GSoC Contributor | 2024

- Selected as one of 967 contributors for the Google Summer of Code 2024 program.
- Chosen from a competitive pool of over 43,000 applicants.
- Demonstrated exceptional skills and dedication in open-source development.

Indic Wikimedia Hackathon | 2024

- Selected as one of the top 30 participants nationwide for an event hosted by the Indic Wikimedia Community in Bhubaneswar, Odisha.
- Contributed to the organization's projects, showcasing commitment to knowledge sharing and community engagement.

FOSS Hack | 2025

- Participated in FOSS Hack, a national-level hackathon organized by FOSS United.
- Competed against over 5000 participants across more than 2500 teams.
- Developed a project that was awarded **fourth** place among over **800 submissions**, recognized as one of the top 10 projects.
