PROFILE

Computer Science undergraduate with an entrepreneurial mindset, passionate about helping to take products from 0 to 1. Experienced software engineer with proficiency in web development, automation, and DevOps with a strong drive to solve complex user problems and accelerate business growth.

EDUCATION

Amrita Vishwa Vidyapeetham <i>Bachelor of Technology in Computer Science and Engineering; CGPA: 9.74/10.0</i>	Amritapuri, Kerala Oct 2022 – July 2026
Montfort World School <i>12th Grade (Non-Medical): 97% — 10th Grade: 98%</i>	Karnal, Haryana 2020 – 2022

EXPERIENCE

Software Development Engineer Intern <i>Galaxy.ai</i>	July 2025 – Sept 2025 Dwarka, Delhi
- Developed new video and chat tools using LLM and vision APIs and Next.js for 1.2M+ Galaxy.ai users, enhancing platform functionality and user engagement - Optimized workflows by refactoring codebase and resolving critical bugs, improving application performance	
Google Summer of Code Contributor <i>Learning Equality</i>	May 2024 – Aug 2024 Remote
- Selected as one of 967 contributors from 43,000+ applicants; designed visual regression testing for Kolibri Design System - Integrated automated visual testing into GitHub workflows using Percy for comparing visual diffs and Puppeteer for managing interactions, enabling 100+ contributors to develop without manual UI testing	
Open Source Contributor <i>Learning Equality & Internet Archive</i>	Nov 2023 – Present Remote
- Contributed UI improvements, backend security fixes (input sanitization), and new features to production codebases - Developed GitHub Actions workflows to automate CI/CD processes and enhance accessibility compliance	

PROJECTS

SpazzAI <i>Next.js, AWS, Serverless Stack (sst.dev)</i> Link	2025
- Led backend development for medical AI platform; architected serverless infrastructure using AWS and sst.dev - Designed UI and prepared platform for data collection phase with 50+ patients	
Human-Computer Interaction Study <i>React.js, Django, Docker</i> GitHub	2024
- Built full-stack application for research study on AI dependency; successfully deployed for 500+ volunteers - Containerized with Docker and implemented efficient data storage system with optimized database queries	
Orbyq Desktop App <i>Spring Boot, Electron, Next.js</i> GitHub	2025
Developed productivity application with real-time tracking and analytics; implemented smart linking using custom JPA queries	

LEADERSHIP & ACHIEVEMENTS

amFOSS Member & Mentor: Mentored **30+ members** in open-source; led hackathons, workshops, and conferences

G20 Representative (2023): Technical expert in cybercrime discussions; inducted into Cyber Volunteer Squad by MHA

FOSS Hack 4th Place (2025): **4th** among **800+ submissions** competing against **5,000+ participants** nationwide

Indic Wikimedia Hackathon (2024): Selected as **top 30** participant nationwide for knowledge-sharing contributions

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, Java, SQL

Frameworks & Libraries: React.js, Next.js, Vue.js, Django, Spring Boot, Flask, Node.js, Tailwind CSS

Technologies & Tools: Docker, Git, GitHub Actions, AWS, PostgreSQL, MongoDB, MySQL

Concepts: Full-Stack Development, UI/UX Design, DevOps, CI/CD, RESTful APIs, Database Design
